

Analogue drying ovens

DO-90

Features

Natural air convection.

Adjustable temperature from 40° C to 250° C.

Temperature regulation by hydraulic thermostat

Homogeneity and stability according to DIN-12880.

Safety according to EN-61010-1, EN-61010-2-010.

Heating by electric resistance, assembled in independent chamber, allowing an optimal stabilization of temperature.

External case epoxy resin painted.

Inner chamber, inner side door and trays made in stainless steel AISI 304.

Silicone sealing gasket.

Adjustable aeration device.

Supplied with:

Two perforated trays made in stainless steel AISI 304 adjustable in height.
